

Project Engineer (m/f/d)

INTAMIN is a world's leading manufacturer of amusement and theme park equipment. The comprehensive product range includes roller coasters, water rides, giant wheels and drop towers.

For our associated company Intamin AG in Wollerau, Switzerland, we are searching for a Project Engineer sharing the passion for our products and displaying the willingness to contribute to the continued International success story of our company.

RESPONSIBILITIES

- Overall project management.
- Technical management/monitoring displaying a "hands-on" approach supervising the installation and commissioning of our products on site.
- Management of engineering, production, procurement and installation deadlines.
- Material and services procurement and cost control.
- Securing of the flow of information within the project organisation and with the customer.

REQUIREMENTS

- BSc or MSc degree in mechanical engineering, ideally 1-2 years of work experience.
- Aptness to deal with substantial and long term travel activities; mainly in Greater China, Japan and Europe.
- English language skills on an International business level.
- Communication skills allowing to fill the role as supervisor as well as business partner with customers and local staff.
- Pragmatic and clear minded "can do" attitude.
- CH/EEA/EU nationality or existing legal residence and work permit in Switzerland.

We are looking forward to receiving your CV joined by the corresponding letters of reference and the documentation on your professional qualifications together with your letter of motivation until January 15, 2020 at HR@intamin.com.
